PROFILE SUMMARY

Full-Stack Developer experienced in building responsive web applications with **React.js, Next.js, TypeScript, Node.js, and Express.js**. Skilled in reusable component architecture, REST APIs, authentication, RBAC, database-driven applications, **Tailwind CSS and shadcn/ui**. Focused on frontend performance, FCP/LCP and Core Web Vitals, with growing knowledge of deployment, cloud hosting, **Generative AI, LLM APIs, prompt engineering, and AI-assisted development**.

EXPERIENCE

React.js Developer — Ballistic Learning Systems | Faridabad, India | July 2024 – Present

- Develop and modernize production applications using **React.js, Next.js, TypeScript, Tailwind CSS**, and reusable component architecture.
- Build responsive interfaces with **React Hooks, Redux, shadcn/ui** and modern frontend patterns; integrate REST APIs and third-party services.
- Optimize rendering, component reuse, lazy loading and API/data handling with focus on **FCP, LCP and Core Web Vitals**.
- Contribute to full-stack workflows using **Node.js and Express.js**, including authentication, CRUD operations and data handling.
- Work with Git/GitHub, environment configuration and **Vercel**-based deployment workflows; expanding knowledge of production delivery.
- Explore **Generative AI, LLM APIs, prompt engineering and AI-assisted development** for productivity and intelligent application features.
- Led UI modernization initiatives that improved consistency, responsiveness and user flow, contributing to a reported **10% increase in user engagement**.

PROJECTS

Shopingly — Full-Stack E-Commerce Platform | React.js · Node.js · Express.js · MongoDB · JWT · Bcrypt

- Built customer/admin workflows including product catalogue, search, filtering, cart, wishlist, checkout and account management.
- Implemented JWT authentication/authorization, Bcrypt password hashing, RESTful backend APIs and complete CRUD operations.
- Developed an interactive admin dashboard with product, cart and wishlist analytics.

Zee-Care — Hospital Management System | React.js · Node.js · Express.js · MongoDB · JWT · Bcrypt

- Developed a hospital platform supporting doctor appointments, patient interactions and role-specific workflows.
- Implemented **RBAC** and dashboards for patients, doctors and administrators; built API-driven authentication and backend workflows.

TECHNICAL SKILLS

Frontend: React.js, Next.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, shadcn/ui, React Hooks

State & APIs: Redux, Context API, REST APIs, API Integration, Client/Server State Management

Backend: Node.js, Express.js, RESTful APIs, JWT, RBAC, Authentication, CRUD, Bcrypt

Databases: MongoDB, PostgreSQL, SQLite, NeonDB

Performance: FCP, LCP, Core Web Vitals, Web Performance Optimization, Lazy Loading, Reusable Components

AI: Generative AI, LLMs, Prompt Engineering, LLM API Integration, AI-Assisted Development, AI Workflows

Deployment: Git, GitHub, Vercel, Environment Configuration, Web Application Deployment

Programming: JavaScript, TypeScript, Python, Java, C++, C, Data Structures & Algorithms

EDUCATION

J.C. Bose University of Science and Technology | Bachelor of Computer Science Engineering | Sep 2020 – July 2024

CGPA: **8.6** · Delhi, India
